61st Annual Fall Bull Sale

December 3, 2026 | 11 AM (MST) | At the Ranch - Harrison, MT

Welcome to SITZ Angus Ranch

Hello friends and happy fall! We hope this letter finds you and your family doing well and that this season has brought you heavy weaning weights, a bit of moisture, safe and efficient cattle working days, and the opportunity to slow down a bit after the long days of summer.

We are pleased to invite you to our 61st Annual Production Sale! A common saying around SITZ Angus is that people don't just buy bulls, people buy from people. We strive to always be the kind of people worth doing business with. We would not be able to do what we do without our customers. Your loyalty, trust, and partnership over the years mean more to us than words can express. We understand that purchasing bull power is a huge investment. At SITZ Angus, we want you to know that we are just as committed to your success as you are. Thank you for believing in our program, for trusting our genetics, and for allowing us to play a role in shaping the genetic future of your cow herd. We look forward to growing alongside you for years to come.

The premise of the SITZ program is simple: breed cattle that are built to last and perform in all segments of the beef industry. This philosophy has always been centered on producing cattle that work—not just for a season, but for generations. We believe in building a cow herd from the ground up, with fertility, fleshing ability, maternal strength, soundness, longevity, and real-world performance at the core. Our selection process is disciplined and intentional, combining the lessons learned from generations of cattlemen with the tools and technology available to us today. We strive to produce bulls that can go to work in a wide range of environments and leave behind daughters that are the foundation of productive, profitable cow herds. Above all, we believe good cattle should make their owners' jobs easier and their operations stronger. That commitment to practical, proven genetics continues to guide every decision we make at SITZ Angus.

The 2026 Fall Sale offering represents another exciting set of genetics at SITZ Angus, featuring sons of SITZ Foundation 9473, SITZ Eternity 739L, M Diamond Ranahan 111, SITZ Heritage 8732, and many other notable sires. We are especially excited about the combination of performance, phenotype, and genetic merit represented in this young set of bulls. Whether you are looking for a sleep-all-night heifer bull, a powerful cow bull that will add pounds at weaning, a bull that fits a specific PAP range, or one with the foot and leg EPDs to make a meaningful impact on your herd, we believe this offering provides the genetic diversity and quality to meet a wide range of needs, all with the same SITZ look.

Ranching is a team sport, and we are fortunate to work with so many good people: our crew, our neighbors, our animal health team, our local community, our customers, and all the amazing folks we work with throughout the year. Each plays an important part in keeping the ranch moving, and we are grateful for the hard work, friendship, and support that surrounds us. The long days, early mornings, and big jobs are made better by good people working alongside you. We are grateful for the men and women who care for these cattle, take pride in the work, and help keep things moving when the days get long. The cattle may carry the SITZ name, but it takes a team to raise them, and we appreciate our crew more than we can say.

Building and maintaining relationships with our customers is a top priority at SITZ Angus. Please feel free to call or visit anytime if you'd like to see the cattle or have any questions. We would be honored to have you join us for all of the sale festivities, and we look forward to seeing you on sale day!

Sincerely,

The SITZ Family

PAP Tested for Over 27 Years

Pulmonary Arterial Pressure (PAP):

Pulmonary Arterial Pressure (PAP) testing is used in cattle as a predictor of susceptibility of High Mountain Disease (HMD). There are many factors that can lead to the presentation of disease in individual animals, but the PAP test currently is the gold standard for testing genetic and environmental components of the disease as all animals with a high PAP test may not show outward signs. Sitz Angus Ranch has seen improvement in our cowherd utilizing the technology and believe if you use the PAP score in conjunction with the PAP EPD that you can put adequate selection pressure on HMD.

Key Factors in Understanding PAP Scores:

Elevation does matter: As elevation increases, the likelihood of cattle becoming hypoxic and elevating their PAP score increases. Scores taken below 5000 feet are less reliable than scores taken over 5000 feet as a small number of cattle are hypoxic at lower elevations. As cattle increase elevation over 5000 feet, the hypoxic state of their lungs increases therefore increasing the reliability of the PAP score. The longer the cattle live at those elevations, the more reliable the test becomes. Generally, tests given to animals living at increased elevations for less than 30 days are not considered reliable. Ideally, animals to be tested at elevation will be in that environment for a minimum of 45-60 days.

Age does matter: As cattle mature they undergo many changes in their cardiopulmonary system affecting the PAP score. These changes can positively or negatively influence the PAP score. Testing of cattle at young ages should only be used as a management tool; it has more variability and less reliability and accuracy than testing of older cattle. It is ideal to test cattle that are at least 12 months old and as cattle reach 18-24 months of age there is an increased reliability of the test for that animal at that elevation. Once cattle are over 2 years of age, there is typically very little change in their PAP score unless other environmental factors have contributed to an increase. (Respiratory infections, intensive feeding programs, cardio toxic plants, etc.)

Picking your ideal animal based on PAP Score: PAP-scored animals should be evaluated in ranges rather than in specific numbers. Through testing we have found that for similar elevations many animals over a score range (2-4 points) have the same likelihood of succumbing to HMD. Furthermore the accuracy of the testing equipment is +/- 1 point. Don't let your ideal animal get away for a few points on the PAP score. If the ideal score for your elevation is a 42, consider all animals below and up to a few points above that score. Animals that score 50 and above should not be used in higher elevation settings as they are highly likely to contract HMD. Even at higher elevations there is a percentage of lower testing animals that will have increased scores and show outward signs of HMD. As the elevation increases this percentage decreases and improves the accuracy of the score.

Pulmonary arterial pressure EPD (PAP) is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score. PAP score is an indicator of susceptibility to high altitude disease commonly experienced at elevations greater than 5,500 feet. Selection for this trait aims to improve the genetic potential for a sire's progeny to have lower PAP scores thus a lower chance of contracting high altitude disease increasing the environmental adaptability of cattle living in mountain areas.

Foundation is a very high performance bull that smashes the scales on pay day! His daughters are very angular and feminine with length and extension and look to be very productive type. Foundation covers the basics for fertility, udder quality, longevity, foot quality, and heart health. Perhaps the $M index sums it up the best ranking at the very top of the Angus breed for profitable maternal genetics in the cow calf sector.

Roger Jacobs, right, Billings - based area manager of the Ame
Assn., looks to a bleachers packed to the rafters crowd, while
Goggins, right, chanted his way through 214 bulls in a little les
hours to post the $2,516 per head average.

tz, Billings-based representative of the
us Assn., offered pre-sale remarks on the
r Angus Cattle and uniform quality of the
lls.

'One of the hottest' characterizes Sitz Angus Production Sale

"One of the hottest" bull sales going, and catering largely to the needs of Montana commercial breeders, has to be the Bob Sitz family's annual Angus production sale at their ranch near Harrison, Mont.

And another highly successful edition went into the "Tri - State Country" history book December 4 as mostly repeat buying commercial cattlemen, largely from the Big Sky state, literally "ate up" a strong offering of 214 coming two year - old bulls to make possible a gratifying average price of $2,516 per head.

Richard Hillman did the bidding for Hay Creek Farms of Sidney, claiming the day's high seller, Sitz Marshall Pride 4529, a long, muscled right, and correct March of 1979 popular offering out of a Emulous and Elations bred dam, for $16,500. Bob and Barry Rice, Rice Ranch neighbors, who have annually picked some of the top sellers at the Stiz sale, were final bidders on the second high dollar bull, Sitz Rito 3729, at $9,000.

Cooney Bros. Ranches, Harlowton, annual repeat buyers, put together 11 bulls most any breeder would be proud to take home, saying $42,500 on the line for a $3,863 per bull average cost. R.L. Todd, and son Ty, Sheridan were top volume buyers, with the purchase of 21 bulls.

Complete sale results will be published when availabl

For more than 35 years, Roger Jacobs *has been a familiar voice and a treasured friend of the Sitz family. Since calling his first Harrison Sale in 1989, Roger has brought his unmistakable enthusiasm, professionalism and genuine love for the cattle business to our sales. Over the years, he has become much more than our auctioneer. He has become part of our family's history.*

Roger has been a tremendous ambassador for Montana Angus cattle and the Angus breed as a whole. His passion, dedication and knowledge of the cattle industry have left a lasting mark on the breed and the people fortunate enough to know him.

Roger, from all of us at Sitz Angus, thank you for your years of loyal service, your friendship and the many memories we've shared along the way.

300 SITZ-Bred Heifers

From the Heart of the SITZ Registered Cow Herd

Updated lot information and head count will be available prior to the sale.

The SITZ bred heifers offered are straight out of the heart of the SITZ registered Angus herd and are the mates to the bulls selling. Every year, these heifers are sought after by producers from all over the country because of the bred-in genetic power.

These heifers are moderate framed, easy fleshing, deep bodied and have the famous SITZ female look. They have all been ultrasound tested by Dr. Liam Robbins and will be rechecked prior to sale day. They will be guaranteed bred when loaded for shipment. They are all current on their shots, however the purchaser must implement their own ScourGuard® program. All health requirements will be met prior to shipping. SITZ Angus will help arrange trucking for these heifers at the buyer's expense.

All heifers sell as commercial heifers with papers available at buyer's request for $350, if transferred within six months and $400 after six months. An additional transfer fee charged by the American Angus Association will also apply.
Transfer request must be made by November 1, 2027.

A complete lot breakdown will be available in early November on our website (SITZAngus.com) or mailed at request prior to the sale. Videos will also be available on all lots.

- **Sorted by calving date, weight and uniformity**
- **Bred to leading AI SITZ calving ease sires and cleaned up with SITZ calving ease bulls**
- **Ultrasound tested for tight calving window**
- **Generations of SITZ bloodlines**
- **AI bred heifers will calve in January and February**
- **Bull bred heifers will calve in March and April**

Updated lot information and head count will be available prior to the sale. Call 406-683-5277 to request the information.

Grouped in load lots. Buyer has the option to take a minimum of 10 head or up to the entire load lot. This is just an approximate breakdown on the heifers. Please request an updated lot list prior to the sale or look for one on sale day. We are happy to email or mail you a copy once the lot details are finalized.

Detailed list will be available by November 15th on SITZAngus.com

Running-Age, Range-Ready,
SITZ-Bred Cows

This offering of 100 bred cows of mixed ages (2018-2024) is straight from the SITZ Angus registered cow herd and bred with the same focus and commitment the SITZ program is nationally recognized for. These cows have proven themselves within our herd and we feel they are some of the top cows in the breed. They have worked for us and they will work for you! This offering has been met our stringent criteria of fleshing ability, udder quality and the ability to raise a big calf year-in and year-out. They are bred to the same breed-leading sires that are utilized throughout our program.

These cows have been ultrasound tested by Dr. Liam Robbins and are safe in calf and will be rechecked prior to sale day. They will be guaranteed bred when loaded for shipment. These cows are on a complete health program and all health requirements will be met prior to shipping. SITZ Angus will help arrange trucking for these females at the buyer's expense.

All females sell as commercial cows with papers available at buyers' request for $350, if transferred within six months and $400 after six months. An additional transfer fee charged by the American Angus Association will also apply. Transfer request must be made within one year of purchase.

A complete lot breakdown will be available in early November on our website (SITZAngus.com) or mailed at request prior to the sale. Videos will also be available on all lots.
