58th Annual Fall Bull Sale

Welcome to SITZ Angus

We would like to sincerely welcome you to our 58th Production Sale! This year we are humbly and enthusiastically celebrating 100 years in the Angus business; a feat that would not be possible without the support and patronage of you, our wonderful customer. Thank you for believing in our program.

We have been blessed to be able to do what we love for this long. We acknowledge the past - the hard work and dedication of our predecessors and the foundation they built for us. We recognize the loyal customers that have sustained our program through the decades. Looking to the future, we are excited to have the fourth generation of the SITZ family (fifth generation Montanans) taking up the reins on the ranch. We are eager to engage with new customers and strengthen relationships with old ones.

Our bulls and females have been raised with you, the customer, in mind. The industry is moving and changing quickly, and we are always trying to be ahead of the curve while continuing to be a source of consistent and quality genetics for the Angus breed. Our bulls are developed on pasture, with keen attention paid to structure and foot quality.

We were at the forefront of PAP testing and currently have twenty-five years of continuous PAP score collection. We are focused on structure, fertility, and maternal traits. We have breed leading bulls for foot angle and claw set EPDs.

Our cow herd earns their living on the ranch. In the summers, our cows must travel on forest service allotments rising up to 8000 feet in elevation. We ask them to keep a calf at their side while living with grizzlies and wolves. In the fall and winter, we keep our cow herd grazing until the snow gets too hard or deep. We allow natural selection to weed out the weak and nonperforming. Calves are weaned on pasture, and the bulls summer on pasture. We are confident that over the last 100 years, we have bred a cow herd that will go to work in all conditions.

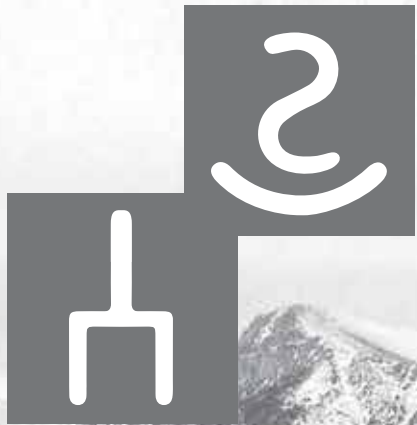

Our mission is to provide you, our customer, with a working relationship that includes the data and tools to make the best purchasing decisions for your ranch, bulls that go to work to sire progeny that performs and prospers, and a guarantee that the SITZ family stands behind our genetics. Over the years, we have traveled thousands of miles delivering bulls, visiting customers, and seeing your operations. We would not be here today without you and your belief in our program and breeding vision.

Our family has 100 years of selectively and individually mating Angus cows. A dedicated and long-standing breeding philosophy like ours is rare these days. We would call it a program built on consistency - cattle with a certain type and kind, a type and kind not built with one or two years in the Angus business but a century. It is our commitment to the industry to provide leading Angus genetics that will meet your needs into the future for the next 100 years.

Many thanks to you and all of our customers that have brought us to where we are today. Please call or visit any time if you would like to look at the cattle or have any questions. We would be honored to have you join us for all of the sale festivities. Thank you for your friendship and support. We look forward to seeing you on sale day.

Sincerely and God Bless, The SITZ family

PAP Tested for Over 20 Years

Pulmonary Arterial Pressure (PAP):

Pulmonary Arterial Pressure (PAP) testing is used in cattle as a predictor of susceptibility of High Mountain Disease (HMD). There are many factors that can lead to the presentation of disease in individual animals, but the PAP test currently is the gold standard for testing genetic and environmental components of the disease as all animals with a high PAP test may not show outward signs. Sitz Angus Ranch has seen improvement in our cowherd utilizing the technology and believe if you use the PAP score in conjunction with the PAP EPD that you can put adequate selection pressure on HMD.

Key Factors in Understanding PAP Scores:

Elevation does matter: As elevation increases, the likelihood of cattle becoming hypoxic and elevating their PAP score increases. Scores taken below 5000ft are less reliable than scores taken over 5000ft as a small number of cattle are hypoxic at lower elevations. As cattle increase elevation over 5000ft, the hypoxic state of their lungs increases therefore increasing the reliability of the PAP score. The longer the cattle live at those elevations, the more reliable the test becomes. Generally, tests given to animals living at increased elevations for less than 30 days are not considered reliable. Ideally, animals to be tested at elevation will be in that environment for a minimum of 45-60 days.

Age does matter: As cattle mature they undergo many changes in their cardiopulmonary system affecting the PAP score. These changes can positively or negatively influence the PAP score. Testing of cattle at young ages should only be used as a management tool; it has more variability and less reliability and accuracy than testing of older cattle. It is ideal to test cattle that are at least 12 months old and as cattle reach 18-24 months of age there is an increased reliability of the test for that animal at that elevation. Once cattle are over 2 years of age, there is typically very little change in their PAP score unless other environmental factors have contributed to an increase. (Respiratory infections, intensive feeding programs, cardio toxic plants, etc.)

Picking your ideal animal based on PAP Score: PAP-scored animals should be evaluated in ranges rather than in specific numbers. Through testing we have found that for similar elevations many animals over a score range (2-4pts) have the same likelihood of succumbing to HMD. Furthermore the accuracy of the testing equipment is +/- 1 point. Don't let your ideal animal get away for a few points on the PAP score. If the ideal score for your elevation is a 42, consider all animals below and up to a few points above that score. Animals that score 50 and above should not be used in higher elevation settings as they are highly likely to contract HMD. Even at higher elevations there is a percentage of lower testing animals that will have increased scores and show outward signs of HMD. As the elevation increases this percentage decreases and improves the accuracy of the score.

Pulmonary arterial pressure EPD (PAP), is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score. PAP score is an indicator of susceptibility to high altitude disease commonly experienced at elevations greater than 5,500 feet. Selection for this trait aims to improve the genetic potential for a sire's progeny to have lower PAP scores thus a lower chance of contracting high altitude disease increasing the environmental adaptability of cattle living in mountain areas.

Spring Cove Crossfire 26H

Reg# 19716901

Crossfire was our selection at the 2021 Spring Cove Bull sale. We admired the capacity and bold sprung rib cage the bull possessed coupled with an impressive EPD Profile. The first Crossfire sons are moderate in terms of frame size and stout in their makeup, with an ample amount of center body to be able to produce efficient, broody females.

Sire: Spring Cove Crossbow
MGS: Basin Bonus 4345
Owned with TD Angus, Triple L LLC, and Spring Cove Ranch

Memorial Obituary
Entered Into Eternal Rest
Sunday Jan. 29, 1989
Bob Sitz
Services for Bob Sitz, 53, of Harrison who owned the Sitz Angus Ranch and had a national reputation for producing top-quality registered Angus cattle, will be Friday at 1 p.m. in the Harrison School. The Rev. Roger Hill and Arvun Athun will officiate. Burial will be in the Valley View Cemetery at Pony.
Mr. Sitz died Sunday from injuries he received in a tractor accident on his ranch.
He was born July 13, 1935 to Will and Frieda Sitz in Kearney, Neb., and graduated from a Denver high school before attending one year of college at Colorado State University. Several years after attending college Mr. Sitz moved to Montana.
He married Donna Scriffly on June 22, 1957 in Colorado.
He was active in state and national Angus organizations and supportive of area youth groups. He supported Montana Range Days at Lewistown, the Madison County 4-H clubs and the annual Sitz Angus scholarship for Harrison High School students.
Mr. Sitz served as director or president of the American Angus Association, Montana Livestock Agricultural Credit Board, the Montana Angus Association, the Southwest Montana Stockgrowers Association and Harrison School Board of Trustees. He was also selected as the state Beef Improvement Federation's top seed stock producer in 1977 and 1984, and was a member of the Virginia City Elks Lodge.
Survivors include his wife; sons Bobby and Jim, both of Harrison; daughters and son-in-law, Debbie and Craig Kukuchka, Belle Fourche, S.D., and Sherrie Sitz, Billings; one grandson; brother Bill Sitz, Burwell, Neb.; and sister, Dee Smith, Cedarville, Ariz.; mother Frieda Sitz, Bozeman.
Memorials to the Bob Sitz Memorial Scholarship Fund for Harrison High School are preferred.

1987 – 250 bulls were offered at the SITZ Angus sale and averaged \$2,691.

Jan. 1989 – A tragic tractor accident took the life of Bob Sr. at the young age of 54.

Oct. 1989 – The decision was made to downsize the mature cow herd after Bob's death to decrease the debt. 718 lots were sold to gross \$1.3 Million. Cows were sold to every corner of the United States. SITZ Everelda Entense 1905 was the top-selling cow at \$10,750.

1990 – SITZ Angus started using embryo transfer.

1991 – SITZ Angus was awarded the Western Regional Environmental Stewardship Award sponsored by the National Cattlemen's Beef Association.

1993 – Bob Sitz Sr Inducted in the Angus Hall of Fame.

New technologies changed the dynamics of the industry. The ranch began to use ultrasound technology and video sales.

1997 – The ranch in Dillon, Montana was purchased along with some summer pasture in the high country. This allowed the opportunity to offer yearling bulls in addition to older bulls summered on range.

Auctioneers, left, and Bob Sitz of Harrison watch the bidding

1999 – At the SITZ Female Sale, 61 lots sold including record setting Everelda Entense 023 for \$300,000 and SITZ Henrietta Pride 501 for \$250,000.

Shown center above is Donna Sitz flanked by her sons, Bob Sitz, Sr. and Jim Sitz, Jr. Harrison, Montana.

Donna Sitz, her sons, Bob and Jim, and daughter Sherrie, run Sitz Angus Ranch near Harrison, Montana. Sitz Angus Ranch has 20,000 acres and 600 head of mother cows. The farming end of the ranch produces alfalfa and grass hay as well as barley, oats and spring wheat.

31 years, and put 60,000 miles a year on these trucks. Jim says, "Most of our highway miles come in December after our bull sale when we deliver our bulls. The deliveries are made with a Ford truck pulling a trailer with a dozen bulls."

As Sitz Angus is one of the largest registered Angus herds in the United States, it creates many challenges for the ranch's Ford trucks. Bob Sitz says, "We have many uses for our Ford trucks around the ranch. We can always use one for inspecting or fixing fences. I like Ford's diesel engine because it has plenty of power. We do all the maintenance here on the ranch. Our Ford trucks are easy to service."

"Ford's suspension seems to get better all the time. They have kept that Ford toughness yet been able to smooth out the ride," adds Bob. Jim agrees when he wouldn't have anything else. "My F-250 4-wheel drive has the 4.0 engine and I am able to help. That makes a big difference to us. We summer up on the mountains so we trailer back and forth. The Ford trucks take a real pounding up there, but they hold together well. The Ford SuperCab is great for me. The extra room makes it much more comfortable," adds Jim.

"Reliability" is the word that best describes Ford trucks for Bob Sitz while Jim Sitz likes "dependability," Bob claims. "We have had such good luck with our Fords that there is no reason to change."

Lot 462 - SITZ Intuition 11092

310 SITZ-Bred Heifers

From the Heart of the SITZ Registered Cow Herd

Updated lot information and head count will be available prior to the sale.

The SITZ bred heifers offered are straight out of the heart of the SITZ registered Angus herd and are the mates to the bulls selling. Every year, these heifers are sought after by producers from all over the country because of the bred-in genetic power.

These heifers are moderate framed, easy fleshing, deep bodied and have the famous SITZ female look. They have all been ultrasound tested by Dr. Liam Robbins and will be rechecked prior to sale day. They will be guaranteed bred when loaded for shipment. They are all current on their shots, however the purchaser must implement their own ScourGuard® program. All health requirements will be met prior to shipping. SITZ Angus will help arrange trucking for these heifers at the buyer's expense.

All heifers sell as commercial heifers with papers available at buyer's request for a \$262 fee in addition to transfer fees charged by the American Angus Association. *Transfer request must be made by November 1, 2024.*

A complete lot breakdown will be available in early November on our website (SITZAngus.com) or mailed at request prior to the sale. Videos will also be available on all lots.

Running-Age, Range-Ready, SITZ-bred Cows

This offering of 110 bred cows of mixed ages (2017-2021) is straight from the SITZ Angus registered cow herd and bred with the same focus and commitment the SITZ program is nationally recognized for. These cows have proven themselves within our herd and we feel they are some of the top cows in the breed. They have worked for us and they will work for you! This offering has been met by our stringent criteria of fleshing ability, udder quality and the ability to raise a big calf year-in and year-out. They are bred to the same breed-leading sires that are utilized throughout our program.

These cows have been ultrasound tested by Dr. Liam Robbins and are safe in calf and will be rechecked prior to sale day. They will be guaranteed bred when loaded for shipment. These cows are on a complete health program and all health requirements will be met prior to shipping. SITZ Angus will help arrange trucking for these females at the buyer's expense.

Grouped in load lots. Buyer has the option to take a minimum of 10 head or up to the entire load lot.

All females sell as commercial cows with papers available at buyers' request for a \$262 fee in addition to transfer fees charged by the American Angus Association. Transfer request must be made within one year of purchase.

A complete lot breakdown will be available in early November on our website (SITZAngus.com) or mailed at request prior to the sale. Videos will also be available on all lots.

Dam of Incentive and Dignity

Incentive is a young stud that is creating a lot of excitement, selling for \$235,000 in the SITZ "Elite Sort" Female Sale where Incentive's dam was the top selling cow for \$160,000. We are just weaning the first group of Incentive progeny and are ecstatic about their performance and eye appealing design. The heifer calves out of Incentive are front pasture kind, sweet fronted, angular, big ribbed, and simply outstanding in terms of phenotype. The udder structure and foot quality on both sides of Incentive's pedigree is simply superb. Look for Incentive progeny in upcoming SITZ Sales, we believe very strongly in the genetic merit of Incentive.

SITZ Dignity Reg# 20003585

The fundamental traits of udders, feet, PAP, and red meat will always earn Dignity consideration in any breeding decision as Dignity offers a solution to many hot button issues that face the breed today. Dignity's 3 generation pedigree is stacked with superb udder quality and top-notch females. We believe very strongly that Dignity is the next step in improving foot quality, as he stems from a lineage of outstanding foot quality, and has always maintained excellent foot quality as an individual. Dignity is one of the lowest PAP scoring bulls in the 25-year history of PAP testing at SITZ Angus. Whether you are looking at PAP scores, EPDs, or pedigree data, Dignity rises to the top for PAP and his progeny should excel at any elevation. The first Dignity progeny are loaded with red meat and true muscle composition and look to be performing very well against their contemporaries. Dignity will be a staple in the SITZ program.

SITZ Emma E 129 - Dam of Domain

Domain was the highest indexing calf for weaning weight in the entire 2021 Harrison calf crop. Couple that with the calving ease and carcass merit he offers, and it's easy to see why we enlisted the service of Domain in our program. Domain was used fairly hard in the SITZ program and looks to be a sure-shot heifer bull with a no-holes EPD tabulation. Combining genotype and phenotype, the Domain progeny will be a feature sire group in the 2024 SITZ Spring Sale.

SITZ Conviction Reg# 19876862

We are very pleased with the first Conviction progeny. Conviction looks to be a legitimate heifer bull that will pound the scales at weaning with the big boys. The Conviction calves are long spined with quite a bit of center body mass. We will continue to use Conviction in the SITZ program due to his overall genetic merit and the quality his offspring possess in terms of phenotype.

SITZ Threshold Reg# 20043616

Threshold was the second-high-selling bull in the 2022 SITZ Fall Sale. Threshold offers a very maternal pedigree known for maternal function while significantly improving carcass traits and end-product merit. We look for Threshold to be a well-rounded breeding bull and are anxiously awaiting his first progeny.

SITZ Royalty Reg# 20117643

Royalty was the top-selling bull in the 2022 SITZ Fall Sale where he made a lot of friends who appreciated the quality of phenotype he possessed. His dam, who is also the granddam of SITZ Logo, has done a terrific job for SITZ Angus. We get awfully excited about the maternal possibilities this pedigree should produce.

Poss Relevance Reg# 20127503

Relevance really caught our eye last winter when touring different sale offerings, and we evaluated him as one of the best bulls we had seen anywhere. He is long spined with an enormous top and rear quarter, moves like a cat, and stands on an ideal foot structure. Marbling and muscle expression rarely come in the same package, so when we found it, we had to own him. We expect big things from Relevance and are anxiously awaiting the arrival of his first progeny.
